

PolicyGen AI

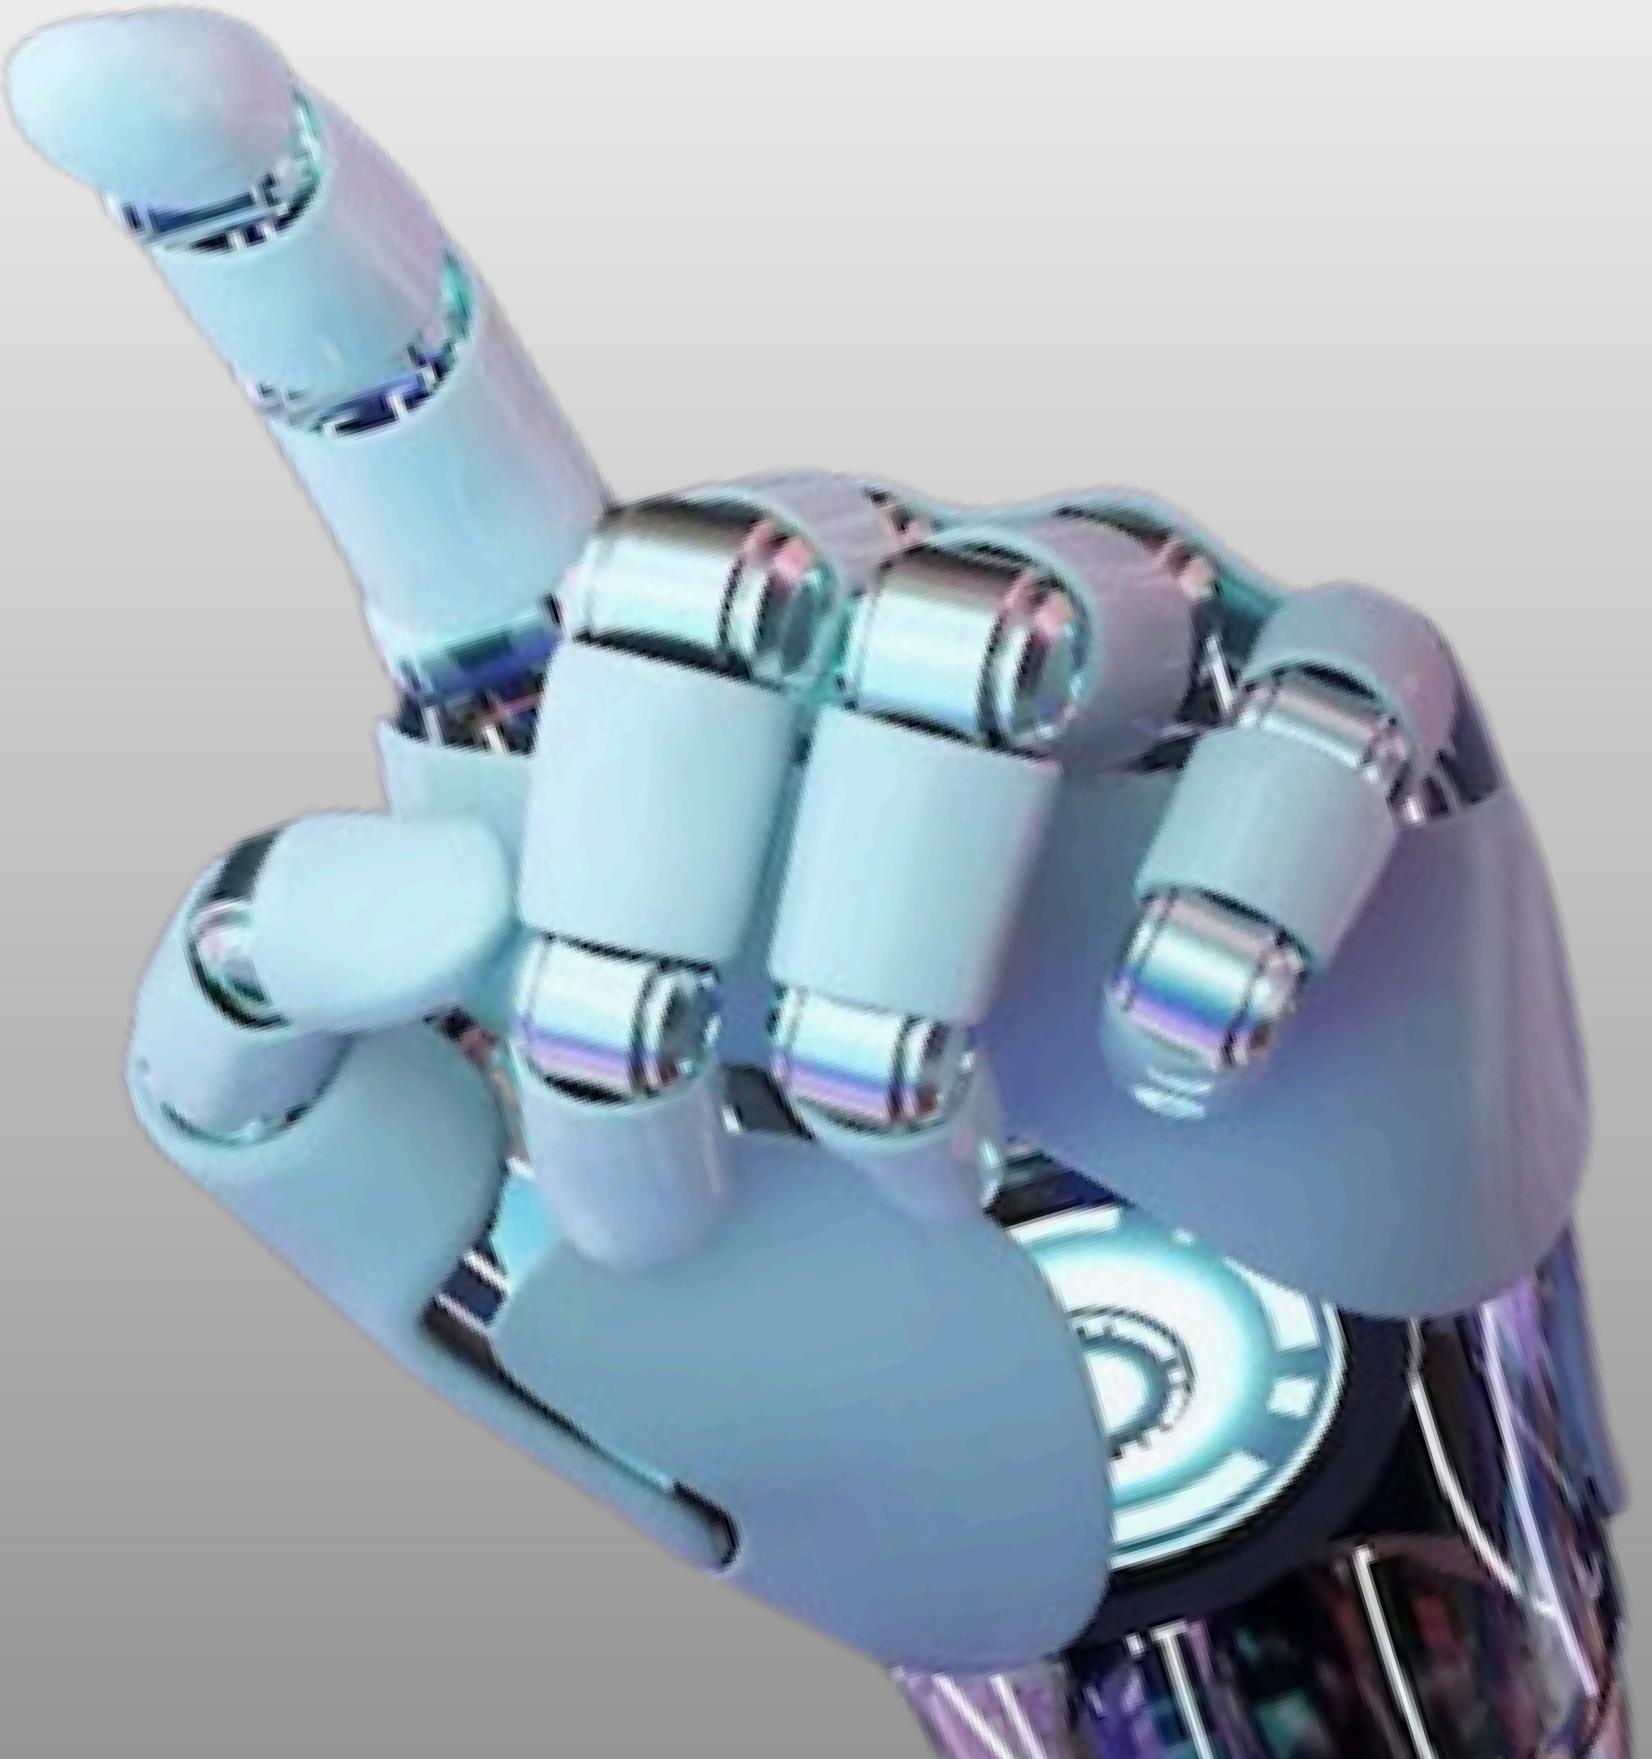

A proposal for the Advocacy & Policy
Department

Why We Need PolicyGen AI?

The expertise is in advocacy—not spending days formatting documents.

Current pain points

- Manual policy brief drafting takes 8–12 hours each
- Inconsistent messaging across stakeholders
- Slow response to emerging issues

How PolicyGen AI Works?

Like a tireless policy assistant, it turns raw data into polished outputs in minutes.

Input

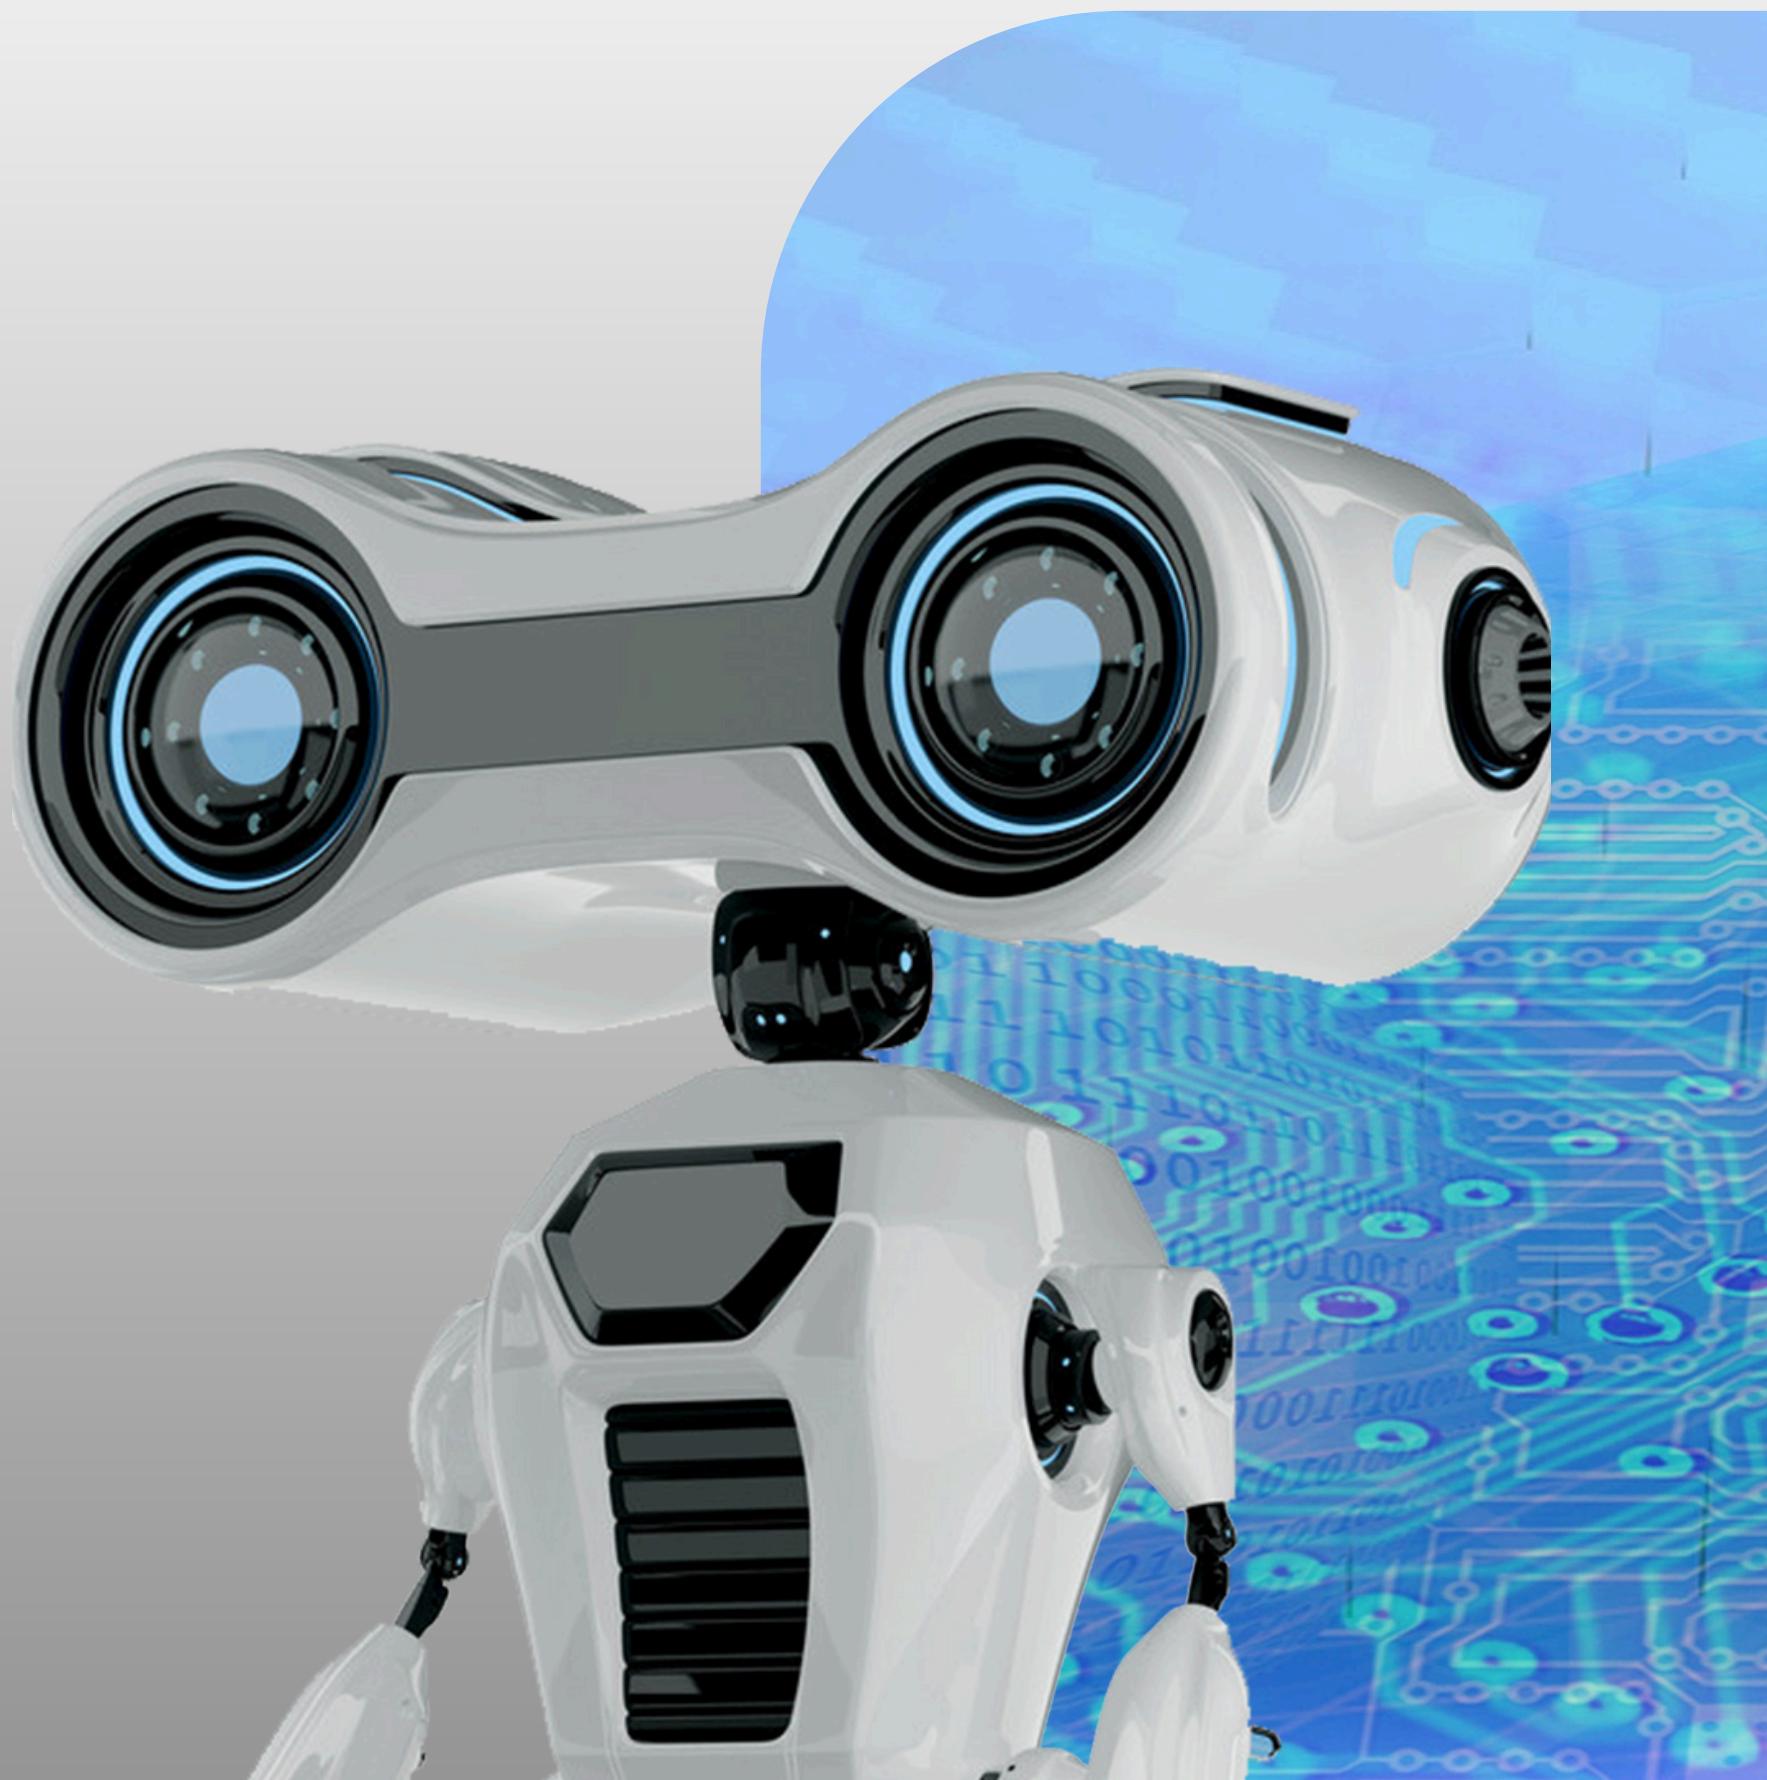

Policy topic + key data points

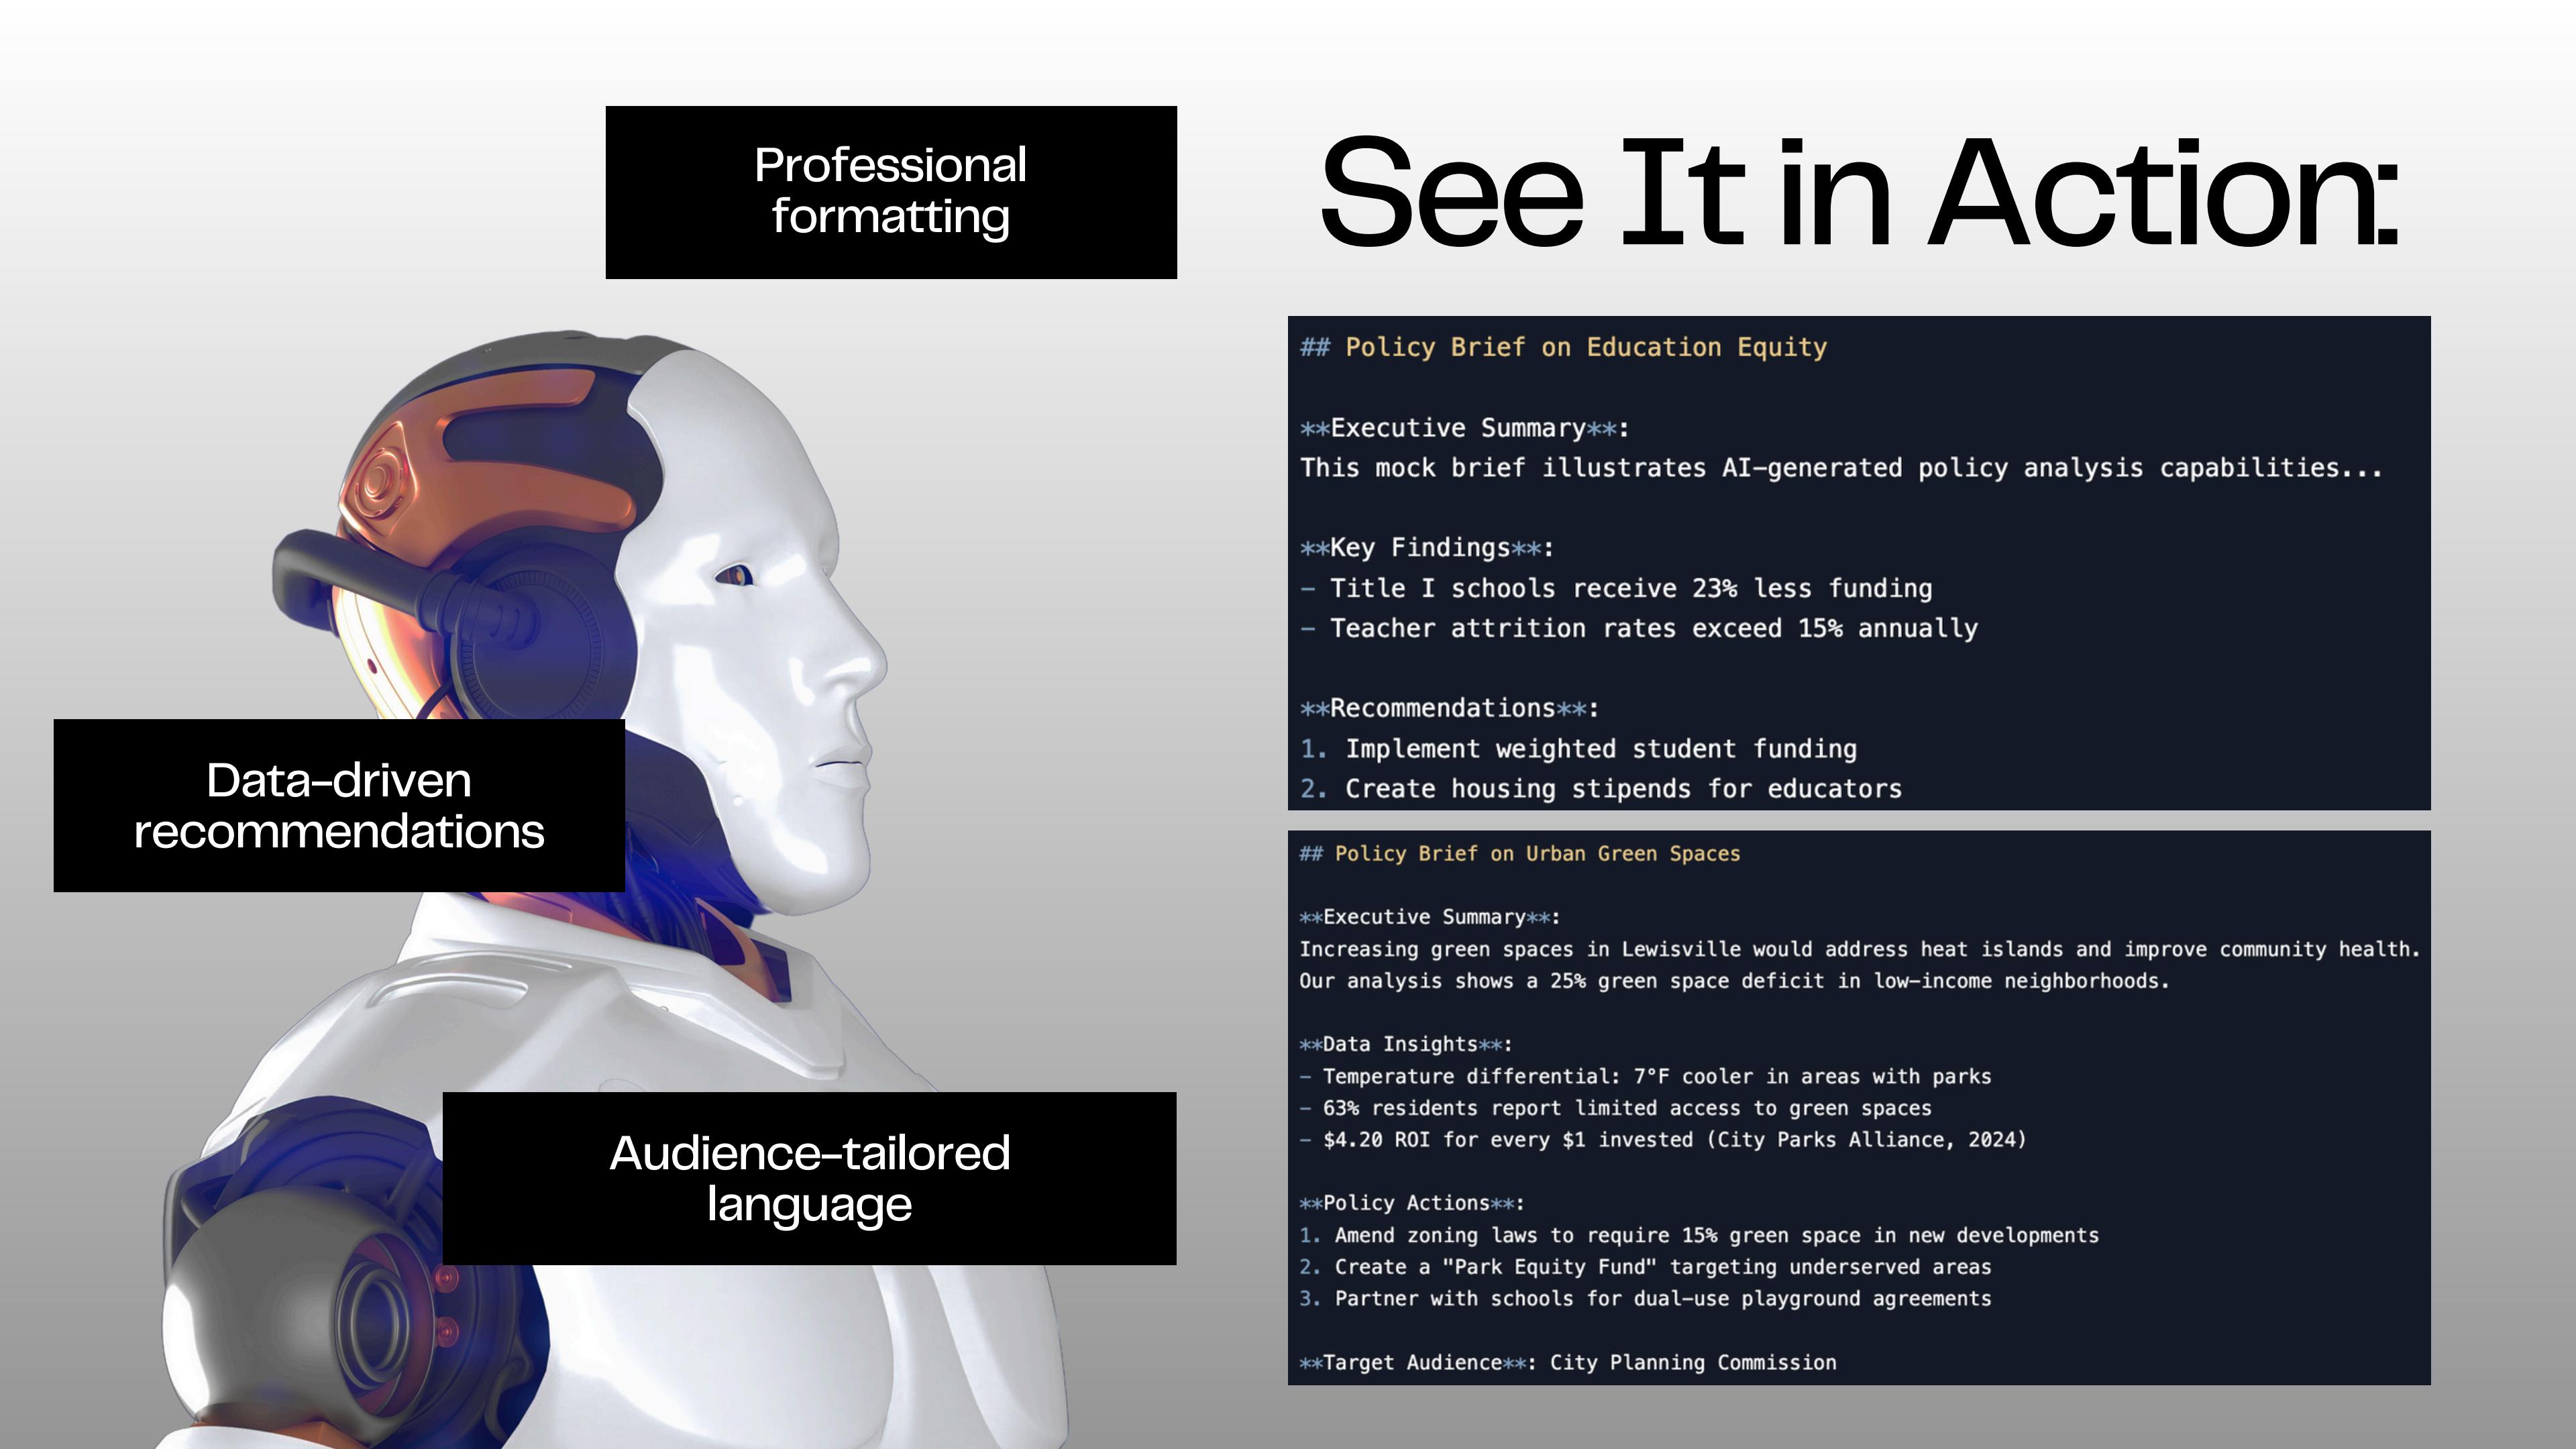

AI Processing

- Analyzes stakeholders
- Structures compelling narratives

Output

- Policy briefs
- Social media posts
- Stakeholder emails

Professional
formatting

Data-driven
recommendations

Audience-tailored
language

See It in Action:

Policy Brief on Education Equity

Executive Summary:

This mock brief illustrates AI-generated policy analysis capabilities...

Key Findings:

- Title I schools receive 23% less funding
- Teacher attrition rates exceed 15% annually

Recommendations:

1. Implement weighted student funding
2. Create housing stipends for educators

Policy Brief on Urban Green Spaces

Executive Summary:

Increasing green spaces in Lewisville would address heat islands and improve community health. Our analysis shows a 25% green space deficit in low-income neighborhoods.

Data Insights:

- Temperature differential: 7°F cooler in areas with parks
- 63% residents report limited access to green spaces
- \$4.20 ROI for every \$1 invested (City Parks Alliance, 2024)

Policy Actions:

1. Amend zoning laws to require 15% green space in new developments
2. Create a "Park Equity Fund" targeting underserved areas
3. Partner with schools for dual-use playground agreements

Target Audience: City Planning Commission

Expected Benefits

This efficiency gain allows us to focus on high-value advocacy work.
